Contents

6. Gas-recombination (Sealed) Lead/Acid Batteries

Evolution of gas-recombination lead/acid cells and batteries 3
R. F. Nelson (Warrensburg, MO, U.S.A.)

Lead/acid recombination batteries: principles and applications 23
N. E. Bagshaw (Stockport, U.K.)

Gas-recombination batteries: from basics to batteries in service 35
S. Warrell (Manchester, U.K.)

Improved gelled-electrolyte lead/acid batteries for deep-discharge applications 43
J. Strebe, B. Reichman, B. Mahato and K. R. Bullock (Milwaukee, WI, U.S.A.)

Sealed lead/acid batteries: theory and applications 57
H. Tuphorn (Büdingen, F.R.G.)

Tungsten carbide electrodes for gas recombination in lead/acid batteries 69
I. Nikolov, G. Papazov, D. Pavlov, T. Vitanov and V. Naidenov (Sofia, Bulgaria)

Sealed lead/acid battery with auxiliary tungsten carbide electrodes 79
G. Papazov, I. Nikolov, D. Pavlov, T. Vitanov, P. Andreev and M. Bojinov (Sofia, Bulgaria)

Poly(aniline)-coated electrodes for gas recombination in lead/acid batteries 89
S. Sarkar and I. N. Basumallick (Santiniketan, India)

Reference-electrode and gassing studies of lead/acid charge–discharge processes 93
J. A. Magyar, M. A. Kepros and R. F. Nelson (Warrensburg, MO, U.S.A.)

Measures for minimizing hydrogen pressure in sealed lead/acid batteries 107
H. Dietz, S. Voss, H. Döring, J. Garche and K. Wiesener (Dresden, G.D.R.)

Preliminary results from an improved theoretical approach towards characterizing sealed lead/acid cells 115
M. Maja and N. Penazzi (Turin, Italy)

Oxygen evolution on lead dioxide in sulphuric acid solutions 121
M. K. Dimitrov (Sofia, Bulgaria)

Relating recombination mat separator properties to sealed lead/acid battery performance 125
D. A. Crouch, Jr and J. W. Reitz (Corvallis, OR, U.S.A.)

Factors influencing the performance of gas-recombination lead/acid batteries 135
J. Kwaśnik, T. Pukacka, M. Paszkiewicz and B. Szcześniak (Poznań, Poland)

Oxygen cycle in sealed rechargeable cells 139
J. Mrha, J. Jindra and M. Musilová (Prague, Czechoslovakia)

High-performance maintenance-free lead/acid batteries 145
C. Böhle and R. Kiessling (Soest, F.R.G.)

Influence of cobalt ions on the behaviour of maintenance-free lead/acid batteries with antimony alloys 151
K.-H. Christian and R. Ackerman (Zwickau, G.D.R.)

Elsevier Sequoia/Printed in The Netherlands

7. Lead/Acid Battery Technology

Continuous production of automotive lead/acid battery plates from lead–calcium–tin strip 157
G. Clerici (Milan, Italy) and N. Penazzi (Turin, Italy)

A new lead–calcium alloy for maintenance-free lead/acid batteries. 163
Shuzhen Zhao, Yuanduo Lu, Zhonghua Zhang and Zhiyun Jiang (Changchun, China)

Effect of some elements on the performance of lead–antimony alloys for lead/acid batteries. 169
Zhiyun Jiang, Yuanduo Lu, Shuzhen Zhao, Weiqing Gu and Zhonghua Zhang (Changchun, China)

Lead alloys into the 1990s. 177
W. F. Gillian (Melbourne, Vic., Australia)

Influence of separators, expanders and electrolyte purity on the performance of maintenance-free lead/acid batteries 183
J. Černý and V. Koudelka (Mladá Boleslav, Czechoslovakia)

Lead/acid battery positive plates manufactured from $4PbO \cdot PbSO_4$ pastes prepared from leady oxide and red lead 189
D. Pavlov and N. Kapkov (Sofia, Bulgaria)

Improving the curing of positive plates for lead/acid batteries 203
D. A. J. Rand, R. J. Hill (Port Melbourne, Vic., Australia) and M. McDonagh (Newport, U.K.)

Accelerated curing of negative plates for lead/acid batteries 217
S. Ruevski and D. Pavlov (Sofia, Bulgaria)

X-ray diffraction studies of basic lead sulphates 225
J. K. Vilhunen (Porvoo, Finland)

Theoretical and practical considerations on the formation of lead/acid battery plates 233
F. Steffens (Boudry, Switzerland)

A study of the oxidation of $4PbO \cdot PbSO_4$ crystals in cured paste to PbO_2 agglomerates during formation of positive plates for lead/acid batteries 243
D. Pavlov and E. Bashtavelova (Sofia, Bulgaria)

Advances in manufacturing systems for tubular positive plates for stationary and traction lead/acid batteries. 255
W. E. Fetzer (Brilon, F.R.G.)

Improvements in the manufacturing of lead/acid batteries with tubular positive plates 263
J. Kwaśnik and H. Krysiak (Poznań, Poland)

Inlfuence of electrolyte temperature and positive-plate thickness on the performance of lead/acid cells 271
N. F. Compagnone (Romano di Lombardia, Italy)

Technology for treating lead/acid battery scrap for secondary usage 281
N. Lyakov (Sofia, Bulgaria)

Recycling of lead/acid batteries: the Ginatta process 287
M. Maja, N. Penazzi, M. Baudino and M. V. Ginatta (Turin, Italy)

8. New Applications of Lead/Acid Batteries

Lead/acid batteries in U.S.A. load-levelling applications. 297
D. S. Carr (Research Triangle Park, NC, U.S.A.)

Operating the world's largest lead/acid battery energy storage system 311
G. D. Rodriguez (Rosemead, CA, U.S.A.), W. C. Spindler and D. S. Carr (Research Triangle Park, NC, U.S.A.)

Lead/acid batteries in Arctic photovoltaic systems 321
O. Ikkala and A. Nieminen (Porvoo, Finland)

Advanced lead/acid batteries for stand-alone power-supply systems 329
A. F. Hollenkamp, W. G. A. Baldsing, J. A. Hamilton and D. A. J. Rand (Port Melbourne, Vic., Australia)

9. New Lead Power Systems

Structure and properties of electrochemically active thin PbO_2 films for reserve batteries 339
S. Tabat, A. Nowacki and B. Szcześniak (Poznań, Poland)

10. Equipment for Manufacturing Lead/Acid Batteries

Improvements to Barton-pot equipment for manufacturing leady oxide. 351
J. E. Dix (Costa Mesa, CA, U.S.A.)

Automation and rationalization of the plate-stacking process for automotive, traction, and stationary lead/acid batteries 355
A. Schwetz (Graz, Austria)

Totally automatic element manufacturing process for lead/acid battery factories. 359
H. Lindqvist (Vantaa, Finland)

Microprocessor-controlled, production-line, high-rate testing of lead/acid batteries with data collection and statistical-process-control evaluation of results 363
D. D. Brandt (Fenton, MO, U.S.A.)

A multifunction battery test facility 369
P. P. Andreev and D. P. Tonchev (Sofia, Bulgaria)

11. Regional Overviews of Lead/Acid Battery Development

Recent new designs and new technologies of lead/acid batteries in Japan. 379
A. Kozawa (Cleveland, OH, U.S.A.)

Marketing forecast — the Indian scene 383
A. Raychaudhuri (Delhi, India)

The lead/acid storage battery industry in Turkey 395
M. N. Türkeri (Ankara, Turkey)

On the historical development of the lead/acid battery, especially in Europe 401
J. Garche (Dresden, G.D.R.)
